

# CREATIVE WRITING I & II

Creativity is a dimension or quality of each person. It cannot be taught, but it can be liberated and motivated, developed, strengthened, and exercised. Creativity can be given an opportunity to express itself.

Creative Writing I & II are that opportunity. Students will extend and apply skills of creative expression and imaginative forms. Emphasis will be placed on both creating and sharing through the use of the writing process and with the goal of publishing works and submitting writing to local, statewide, and national writing contests.
